# NATIONAL CEREALS AND PRODUCE BOARD

Leaders in Trade & Management of Agricultural Commodities

## WEEKLY MARKET PRICES SURVEY REPORT FOR THE WEEK ENDING 28TH JULY 2023

### 1. Food Security, Technology and land demarcation

In some few weeks ago, Nation Media Group and partners held a Wheat Expo in Eldoret, Uasin Gishu county. The theme of the two- day event was Growing Wheat sustainably for a Healthier and wealthier Nation. This event, attracted various stakeholders across the country, among them were farmers, Millers and manufacturers of farming machines. This event was held when the country is experiencing land demarcation and converting them into real estates. Over the years, the production of this commodity across the country has been dwindling due to increased pest infection, climate change, high cost of inputs and poor post harvesting services. All these factors have contributed heavily in the increased level of importation of wheat in the country. In every year, Kenyans imports up to 90% of the to total wheat consumed in the country from Ukraine, Russia and other countries (NATION, July 22, 2023).

During the expo, experts encouraged farmers to take up contract farming and invest in the modern technology during farming, weeding, harvesting and post-harvest services. Among the equipment that were displayed during the event were Moisture-meter, Boom sprayer and Baler. It was recorded that in last year, farmers made a loss of up to 30% of the yields due to failure to control moisture content (NATION, July 22, 2023). NCPB has noted that not every farmer cannot afford to buy these farming machines and provide a professional service to their grains. The Board will offer reliable, affordable and professional services to farmers during planting, weeding and post harvesting services.

### 2. Climate outlook

#### i. The Rainfall Forecast for July 2023

The forecast indicates that several parts of the country will be generally dry and sunny during the month of July 2023. However, near to below-average rainfall is expected over the Highlands West of the Rift

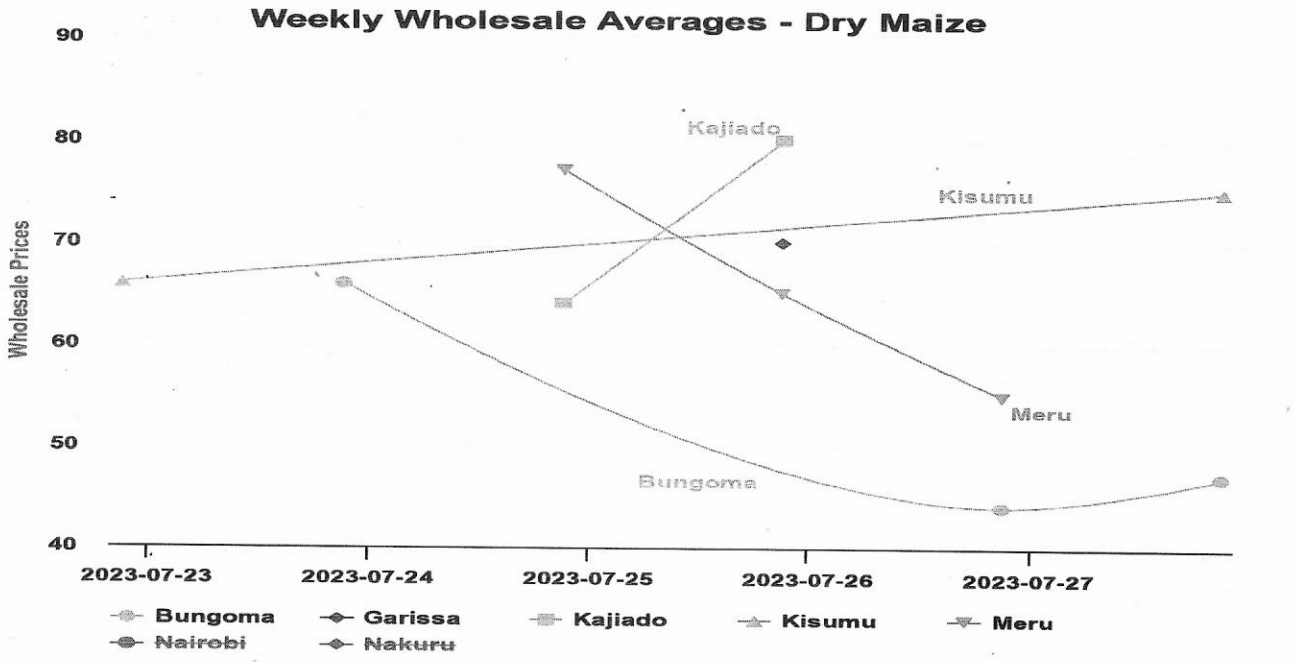

Valley, Central Rift Valley, Lake Victoria Basin, South Rift Valley while areas over Northwest are likely to experience below average rainfall. The Coastal strip is likely to receive near average rainfall. Occasional cool and cloudy conditions with light morning rains are likely to be observed in the Highlands East of the Rift Valley (including Nairobi County) and some parts of the Southeastern lowlands, Highlands West of the Rift Valley, Central and South Rift Valley (METEOROLOGICAL, June 29, 2023).

## 3. Maize

The importation of this commodity from our neighboring country (Tanzania) is still ongoing and the prices have started to decline as recorded in some parts of the country. This importation is expected to address the projected shorted after Kenya farmers harvest their long rain produce.

In this week, Agriculture Information Resource Centre conducted a market price survey in, Kajiado, Meru, Kisumu, and Bungoma counties and collected wholesale prices of 90kg bag of maize. The data was recorded, analyzed and generated information in the *graph 1* below. By the close of business on 28th July 2023, Kajiado was selling at the highest price where 90kg bag was Kes.7,200 and Bungoma was selling at the least price of Kes.4,230 (KAMIS, July 28, 2023).

*Graph 1: weekly average price for dry maize*

*Source: Kenya Agricultural Market Information System (KAMIS)*

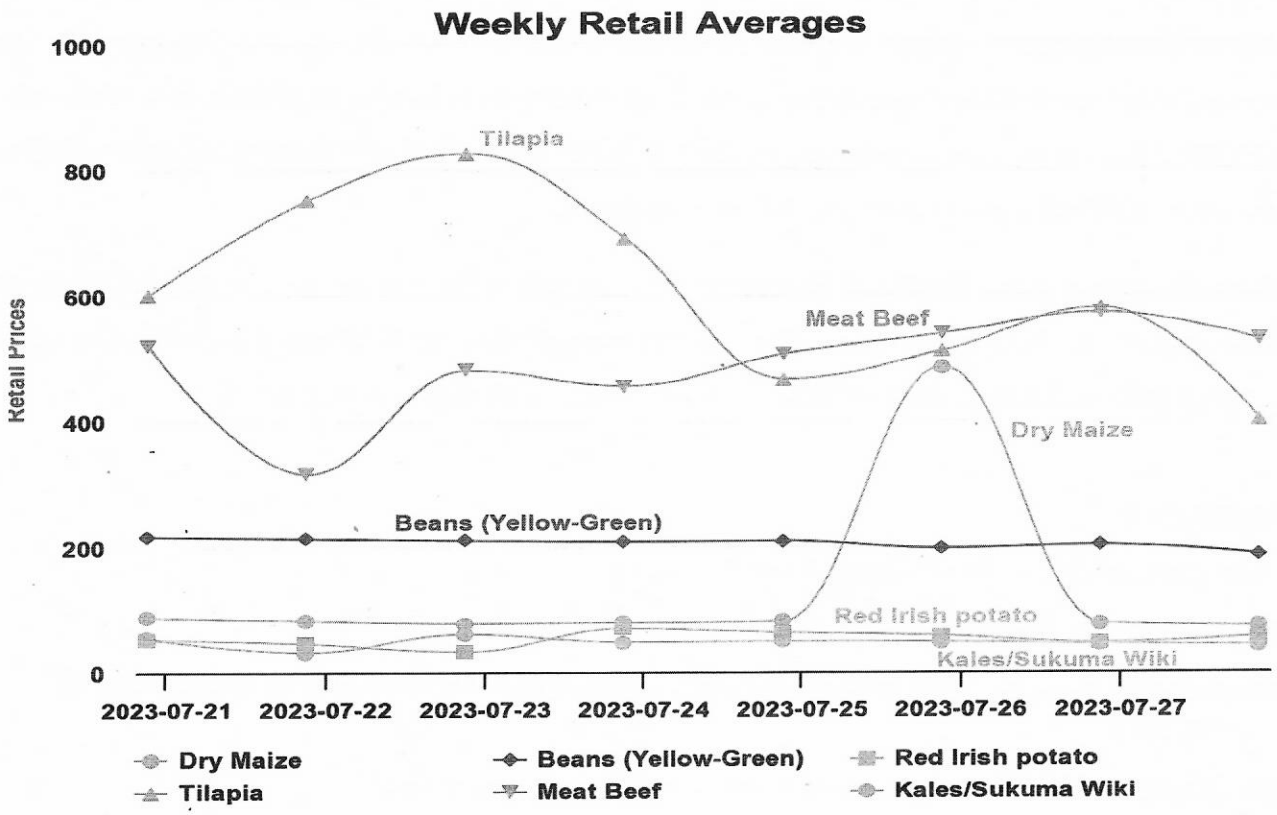

NCPB IS ISO 9001:2015 CERTIFIED

NCPB also performed a comprehensive market price survey of maize for the week under review in various regions across the country, as shown in ***Annex 1.*** The average farmgate price of 90kg bag across the country is Kes.6,121.

## 4. Beans

Farmers across the country who planted during the long rain season have started harvesting this commodity. The data that was gathered by the Board staff in regions, some farmers in SouthRift and NorthRift regions have started disposing off the surplus in the market. As a result, the supply has started to increase and sale price is now declining. In this week, the Agriculture Information Resource Centre conducted a market survey across the country and it was noted that 1kg was selling at an average price of Kes.187 down from Kes.203 recorded in previous week. The *graph 2* below gives more details (KAMIS, July 28, 2023).

*Graph 2: Weekly retail prices for various commodities*

*Source: Kenya Agricultural Market Information System (KAMIS)*

In addition, as shown in ***annexes 2***, the Board performed a weekly market price survey across the country for variety of beans. The National weekly average prices indicate that 90kg of Yellow bean was selling at Kes.14,847, Mwitemania at Kes.13,907, Rose coco at Kes.13,493, and Red Haricot at Kes.12,931 respectively.

## 5. Green Grams

There is an improvement in supply of this commodity in the market compared to what was recorded in the previous week. From the data obtained from Carrefour Supermarket, 1Kg was selling at Kes.175 (Carrefour, July 28th, 2023). In addition, NCPB staff conducted a market survey of this commodity across all regions as indicated in ***Annex 3*** and the national average cost of 90kg bag was Kes.13,312.

## 6. Fertilizer

The Board has continued to supply assorted subsidized fertilizer across the country. This move by the government is expected to boost agriculture sector, create employment and produce cheap food. Currently, most NCPB depots across the country are stocked with this commodity and farmers are encouraged to visit the nearest NCPB depot to purchase the commodity.

In this week under review, the Board conducted a survey across the country to evaluate the prices of fertilizer available in these agro dealers. The national average price for DAP was Kes.5,987, CAN was Kes.4.963, UREA was Kes.5,691 and NPK was Kes.5,960 as indicated in ***annex 4.***
